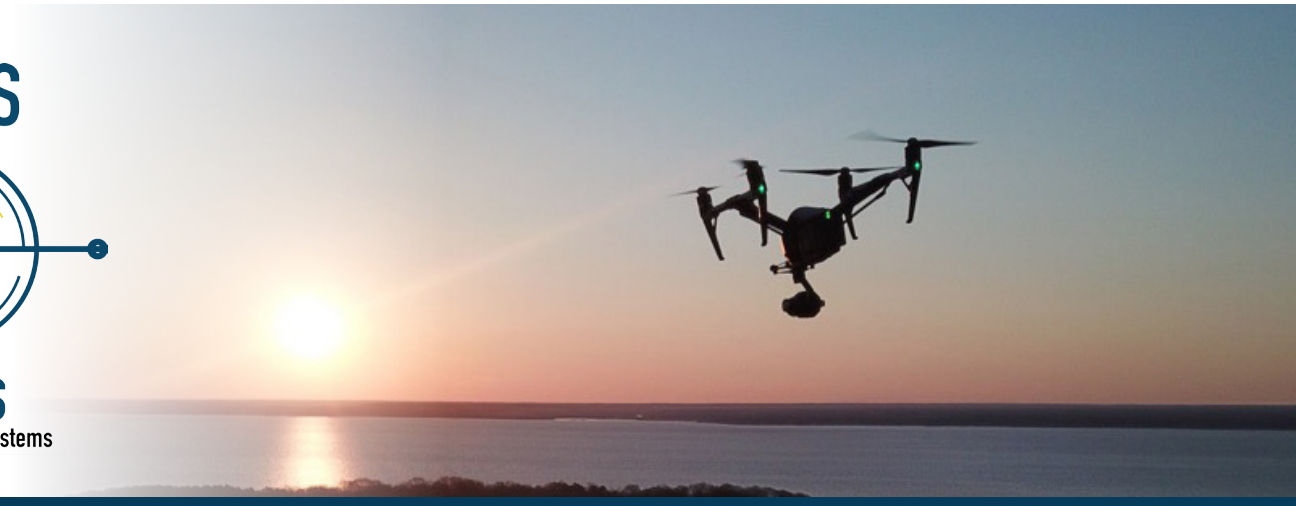
FOCUS UAS
Unmanned Aerial Systems



THE POWER OF PERFORMANCE

FOCUS-DELIVERED CUTTING-EDGE LEADERSHIP

Focus UAS was established to revolutionize drone applications through leading edge technological research and development. We will globally transform the way the world travels day-to-day, engages in business operations, and views efficiency and sustainability of resources. This keeps in mind the future and unlimited possibilities for improving life and living.

THE FUTURE OF REMOTE AERONAUTICS MANAGEMENT

Unmanned aircraft systems (UAS) are quickly emerging as the new technology helping businesses discover new ways to improve efficiency and operating margins. Focus UAS will be the gold standard in this industry.

- **Focus UAS** works with business and government organizations to design and implement innovative drone solutions that deliver quantifiable results.
- **Our FAA certified** flight teams use state-of-the art aircraft systems matched with the customized payload sensors to capture data that delivers actionable business intelligence.
- **FOCUS** was established to revolutionize drone applications through leading-edge technological research and development.
- **FOCUS** is the obvious choice for leaders seeking to elevate their capabilities into the realm of unmanned aerial vehicles and the future of aviation. Contact us to learn more about how the World's Largest Air Force™ can assist your organization.

FOCUS understands that the commercial and military impact UAVs will have in the next few years is extremely significant, creating more than 150,000 new jobs by 2020!

PROFESSIONALS

Aeronautical Decision-Making (ADM) skills, risk management modeling, and pre-flight, flight, and postflight checks are all components of the Airborne Response flight protocol. Our training separates our FAA certified Pilots-in-Command from that "guy" down the street who shoots your neighborhood weddings. Yes, we'll accomplish your mission objectives, but we'll do it in the safest manner possible while also ensuring the highest level of quality and professionalism.

SAFETY

It is the basic principle ingrained in everything we do. Every mission we fly, we first evaluate the mission profile for each flight and use specialized criteria to weigh the operational risks before each launch.

OUR SERVICES

Tower audits • Pipeline audit and monitoring • Power-line inspections • Marina audits • Construction audits • Infrastructure audits, Bridge and Overpass inspections • Ship yard audits • Dam inspections • Real estate and land surveys • Military defense applications • Military intelligence applications • Global search and rescue operations • Rapid response and emergency services • Energy pipeline and electrical line monitoring • Aerial Photography and film • Entertainment based music videos and video shorts
